Pleaese reject NAB's Petition 04-160! It is in everyone's best interest to have access to local weather and traffic. As you may know there were hundreds of severe thunderstorms and tornadoes in the midwest this month. I was travelling on business and driving through some of these affected areas. If it were not for XM's traffic and weather I would not have been alerted to these conditions and would have had to detour hundreds of miles backwards, or even worse, because of damaged roads and dangerous conditions. How could anyone have an argument that providing a service such as traffic and weather and other crucial information broadcast in ANY medium be detrimental to the NAB! Especially in this time in America when terrorism is a "when" and not an "if". I'm sure that "when" an attack happens again XM's Local traffic and weather stations would be interrupted with crucial information. Isn't providing information in any way possible, some which could be life saving more important than advertising dollars!
